

EAE GROUP IN NUMBERS

#FutureTogether

Since 1973

EAE Group of Companies started its journey in the electrical sector in 1973 with the establishment of EAE Elektrik. Since its founding, EAE has grown rapidly, expanding its production and areas of operation by incorporating EAE Lighting in 1983, EAE Machinery in 1996, EAE Electrotechnics in 2004, and EAE Technology in 2009.

EAE carries out its production activities in accordance with ISO 9001 Quality Management, ISO 14001 Environmental Management, ISO 14064-1 Greenhouse Gas Management System, ISO 45001 Occupational Health and Safety Management, ISO 10002 Customer Satisfaction Management, ISO 50001 Energy Management System, and ISO 27001 Information Security Management System standards.

RSP

Rectangular Smart Profile

Advantages

- Provides 4 times the assembly speed compared to traditional welded manufacturing.
- Thanks to its modular structure and accessories, it provides creative and easy application.
- It does not require the use of nuts and washers with the smart bolt application at the connection points.
- It offers the advantage that it does not require welding.
- On long runs and heavy load requirements, RSP system provides better solutions.
- Hot Dip and Stainless Steel material options are available for corrosive environments.

Technical Information

- Standard length:
3000mm - 6000mm
- Available sections:
50x100 - 80x80 - 100x100 - 100x120 - 150x100
- Thickness:
ø3mm - ø4mm
■Please call our company for your orders in different thicknesses and sizes.
- Available surface:

SS304 - SS316
Stainless

Hot Dip
Galvanized

Electrostatic
Powder Coated

Pre-galvanized
(Please contact the
customer representative.)

Engineering Solution Center:
Project support is offered by our expert
engineers, presenting the most suitable
solutions for your applications.

RSP Profile System is
manufactured in Leed GOLD
Certified production facilities.

Thanks to the use of conical
threaded bolts, the need
for washers and nuts are
eliminated.

Workmanship:
Labor costs are reduced
with functionally designed
fittings.

With its unique aperture structure,
fasteners can be mounted up to M16
width.

Quick Assembly:
4 times quicker assembly
compared to traditional welded
manufacturing solutions.

RSP Profile Systems demonstrates
high performance at significant
weights and wide suspension
intervals.

It offers the most suitable solution in wide beam ranges within electro-mechanical applications. A multi-storey system can be designed by using a horizontal console.

Since it is a product with ideal suspension optimization, it allows electrical and mechanical installations to be conveyed on the same line. In this way, the suspension costs of the project are reduced. Flexible solutions are provided with wall, floor and ceiling applications.
